---

**STEP 3**

From inside the door, remove the T-20 torx screw holding the exterior plastic triangle piece in place, at the arrow in **Figure 3**.

Once the screw is removed, lift straight up on the exterior trim piece and it will pop loose.

---

**STEP 4**

Attach the supplied curved adapter to the AWE Foiler™, using the enclosed T-15 Torx screw, as shown by the arrow in **Figure 4**.

**NOTE:** Do not over-tighten this screw. Doing so may cause damage to your Foiler™.
**STEP 5**

Mount the now-assembled AWE Foiler™ on the car in the same orientation as how the factory trim piece was mounted. Slide the upper mounting point in first to ensure the Foiler™ is fully attached. Fasten the lower mounting point using the factory T-20 torx screw.

Repeat steps to install the AWE Foiler™ on the passenger side of the vehicle.

**STEP 6**

Due to the variety of model fitments and mid-year changes, a small gap may be visible at the base of the Foiler™, as shown by the arrow in Figure 6.

**ENJOY!**
CARE

Once installed, the AWE Foiler™ will eliminate wind buffeting in the interior of the vehicle when only one window is in the down position. Avoid using polishes or waxes on injection molded parts, the compound can be difficult to remove from the porous surface finish.
