1 Chassis Alignment Tool

Step 1

Remove the belly pan by loosening the quarter turn fasteners.

Step 2

Support engine with a jack and loosen eight subframe bolts, shown at arrows in Figure 2.

Step 3

Locate the alignment holes at the front outer corners of the subframe, towards the front of the vehicle.

With the subframe fully loose, insert the tool through the alignment holes into the chassis of the vehicle. Do not force the tool into position as the subframe is thin cast aluminum at this point. Once the tool can be inserted without effort into both alignment holes, the subframe is properly centered left to right on the vehicle.

Tighten the bolt nearest to the tool on one side, then check other side with tool to ensure that the holes are still aligned, and then tighten the bolt on that side.

Tighten the remaining bolts and recheck subframe position with tool. Torque spec on these bolts varies from car to car, so check install manual for proper spec.
Thank you for choosing AWE Tuning as your performance automotive parts supplier. Please remember that a performance car is only as strong as its weakest link. Therefore, it is vital that you maintain your vehicle to factory specifications.

By installing or using the purchased product, the Consumer accepts this warranty and any specific Manufacturer warranties enclosed.

**Limited Warranty**

The following warranty is valid only in the United States.

The Manufacturer’s full warranty applies to all products sold.

Secor Ltd. (AWE Tuning) warrants to the original retail purchaser (Consumer) this product (AWE Tuning Audi Alignment Tool) against manufacturing defects for:

ONE YEAR from date of original purchase.

Upon verification of warranty coverage, AWE Tuning will repair or replace the defective product at their discretion, without charge. This is the only remedy the Consumer has for any loss or damage, however arising, due to nonconformity in or defect of the product. This warranty does not cover consequential damage, loss of time or revenues, labor costs, inconvenience, shipping costs, loss of use of vehicle, damage to the vehicle or components, or other incidental or indirect damage.

All warranties are void if the product was not installed by a certified auto mechanic, improperly serviced, modified, or used in a way not intended by the Manufacturer. Use of product in Motorsports or Racing conditions is grounds for warranty denial. Motorsports and Racing is an inherently abusive operational condition, and it is impossible to warranty for this type of usage.

The Consumer is responsible for ensuring that the product is installed in a safe and proper manner, and should cease usage of the product immediately if an unsafe or improper condition is noted. If an unsafe or improper condition is noted, the Consumer should then immediately contact the facility where the product was installed or AWE Tuning directly.

Please contact the original place of purchase for any warranty claims or explanations of this document.
